Handmade Wobblers

The Story

About Hunter

It might have been only a dream. In that dream he came so quietly that I could not hear him. He was more of a ghost than a man. I can see him coming in the autumn mist. I am catching my breath and trying to perceive every detail. He is faintly familiar to me, I may have seen him before.

He is an old man with wise eyes and the passion of a hunter. He is taking me to the river and I have a feeling that he knows every single stone, every pool and even every fish there.

He is showing me places where the biggest Trout and Chub are lying, where to look for the Queen of the river, the big Huchen. He is teaching me how to look into the water and explore its secrets using a Wobbler that he created to its transcendence. His hands proof silently that visualising the dead matter is a real art.

I am getting to know the world of magic Wobblers with multipurpose use. There are many different ways to spin them in the water, there are many different shapes and colours. There is a different Wobbler for each kind of fish, river or lake, season or even hour of the day.

He vanished into thin air and I am suddenly hesitating, was it just a dream or not? While thinking I look at the number of Wobblers with a lot of colour combinations that remained on an old tree stump after he disappeared...

About the company

Let us introduce ourselves

Wobbler is a lure that became a passion for us. Only a fisherman can visualise the dead matter an especially an Angler who is addicted to this passion. The Company RAPHY (slang name for asp), represented by Mr. Sebastian Piekarski, was established in 1999 after many years of observation, gaining experience from knowledgeable fishermen and testing the Wobblers. It was set up in Poland, the Country we can call the Country of spinning. To be able to establish in such an exacting market means to succeed in product quality and uniqueness.

In 2005 Mr. Sebastian Piekarski met with David Koloušek, an enthusiastic fisherman, who was studying fisheries at University in České Budějovice at the time. They agreed to co-operate and after a few years they decided to establish together a Czech-Polish firm called Lovec-Rapy. Currently Lovec-Rapy is represented in many European Countries and it is still expanding.

We will illustrate each lure in the range and how each of our Wobbler is designed to attract the different Species, we hope that this will enable you to make the right choice of lure for your particular needs.

Shiner

Amazing sinking and floating

The shiner is a wobbler designed especially for asp. Its natural shape resembles a small fish. We make it in two versions - diving and floating. The diving version is quite heavy and able to be cast long distances. The floating version is excellent for fishing all types of small streams and rivers where the current can work the lure.

Recommended for: Asp

Model / Length	Art. Nr.	Version	Weight	Hooks	Diving depth
Shiner 7 cm	SH7F	floating	5,2 g	2 x nr.6	0,1 – 0,4 m
Shiner 7 cm	SH7S	sinking	7 g	2 x nr.6	0,3 – 0,7 m

Tip

The asp has excellent sight, so the best chance of catching it is in running water, where it has no time to examine the situation, and must react and attack quickly. It is very effective to spin very quickly just under the water surface.

Available colours:

Available colours:

Power Pike

Amazing floating

All Wobblers from the Lovec-Rapy Company were and still are designed to imitate real fish and their prey, this is evident in the newest POWER PIKE models. They are perfect Wobblers for both lake and river fishing from the bank, where slow spinning and making jerky retrieves is recommended.

Recommended for: pike, zander

Model / Length	Art. Nr.	Version	Weight	Hooks	Diving depth
Power Pike 7 cm	PK7F	floating	5 g	2 x nr.8	0,5 – 1 m
Power Pike 11 cm	PK11F	floating	8,8 g	2 x nr.4	0,5 – 1,5m
Power Pike 14 cm	PK14F	floating	23 g	2 x nr. 1	0,3 – 1,8m

Tip

When fishing in rivers, and spin against the current, if you can, hold the wobbler against nearby fallen trees or bushes and let the current do the work

Shiver Pop

Amazing floating

The SHIVER POP is a new type pop generation Wobbler. In comparison with classical pops, where you work mainly by rod tip movement, the SHIVER POP also works in standard spinning situations, this is a very potent weapon with countless possibilities.

Recommended for: Asp, perch, pike

Model / Length	Art. Nr.	Version	Weight	Hooks	Diving depth
Shiver Pop 7 cm	SP7F	floating	4,3 g	2 x nr. 8	surface
Shiver Pop 9 cm	SP9F	floating	10 g	2x nr. 6	surface

Available colours:

Available colours:

Ablet

Amazing sinking and floating

The wobbler in the size of 4 and 5 cm resembles a little fish. It gained its movement from Mother Nature. The fine action is achieved by subtle work of the wobbler and simultaneous side movement that gives an attractive glitter. The 4 cm long wobbler is exceptional to use especially in mountain – rivers. It is better to use the 8 to 10 cm size wobbler for bigger predators.

Recommended for: (size 4 – 5 cm) trout, perch, chub
(size 8 – 10 cm) pike, zander, asp

Model / Length	Art. Nr.	Version	Weight	Hooks	Diving depth
Ablet 4 cm	AB4F	floating	1,2 g	2 x nr. 14	0,5 - 1,2 m
Ablet 4 cm	AB4S	sinking	1,4 g	2 x nr. 14	0,5 - 1,5 m
Ablet 5 cm	AB5F	floating	2,5 g	2 x nr. 10	0,5 - 1,5 m
Ablet 8 cm	AB8F	floating	6,8 g	2 x nr. 8	1 - 2 m
Ablet 10 cm	AB10F	floating	8,2 g	2 x nr. 6	1,5 - 3 m

Tip

When fishing across the current do not forget to use small jerking movements of the rod tip or, even better, stop the Wobbler for a moment and let it float freely then count to three and start spinning again. The fish takes the bait usually when you start moving the wobbler again.

Humpy

Amazing sinking and floating

The HUMPY is a multipurpose Wobbler, its bulbous shape and longer diving lip make it ideal for rivers with a strong current. Its action is quite small with an effective side movement. The 2cm size is ideal for perch fishing.

Recommended for: trout, perch, chub

Model / Length	Art. Nr.	Version	Weight	Hooks	Diving depth
Humpy 2 cm	HM2F	floating	1 g	1 x nr. 12	0 - 1,2 m
Humpy 2 cm	HM2S	sinking	1,1 g	1 x nr. 12	0 - 1,5 m
Humpy 3 cm	HM3F	floating	2,2 g	2 x nr. 14	0,8 - 1,5 m
Humpy 4 cm	HM4F	floating	3,6 g	2 x nr. 12	1 - 2 m

Tip

The HUMPY model is an exceptional Wobbler for Chub, use the 4cm model with a light line and cast it to the far bank, hold the rod up high and watch the contact with the lure, the action resembles a wounded fish having difficulties with the current, the frequency of takes will surprise you.

Available colours:

Available colours:

Banana

Amazing sinking and floating

Are you standing in a current near a pool that is full of fish? Take the 4cm BANANA model and you will not regret it! This Wobbler is mainly designed for flowing water, it dives quickly to the bottom with the help of a gentle action. Do not forget that barbel love this type of Wobbler, they often attack by lying over it. The 6cm type is truly a multipurpose Wobbler, originally designed for Sea Trout, it can be used for a wide range of predators, it works perfectly well at all retrieve speeds; the action is quite aggressive with a wide range of movement.

Recommended for: (size 4 cm) trout, chub, grayling, bream, perch,
(size 6 cm) sea trout, pike, zander, trout, perch, bass

Model / Length	Art. Nr.	Version	Weight	Hooks	Diving depth
Banana 4 cm	BA4F	floating	2,5 g	2 x nr. 12	1 - 2,5 m
Banana 4 cm	BA4S	sinking	3 g	2 x nr. 12	1 - 3 m
Banana 6 cm	BA6F	floating	5,9 g	2 x nr. 8	1,2 - 3,5 m

Tip

If you are standing at a pool in the river, let the BANANA model go down to the bottom and reel very slowly or not at all, the attractive movements will do the job. For a better effect, hold it in the current, loosen it, then hold it again, this imitates smaller fish concentrating on feeding.

Aggressor

Amazing floating

This one has a special straight back, arched ventral part and long lip. The centre of gravity is very low, all this plus the gentle work, makes it sink fast. Use this Wobbler in the river pools and also in places like wash banks and overhanging branches.

Recommended for: (size 5 cm) – Trout, perch,
(size 7-9 cm) – Pike, zander, cat fish

Model / Length	Art. Nr.	Version	Weight	Hooks	Diving depth
Aggressor 5 cm	AG5F	floating	3 g	2 x nr. 10	1,5 - 3 m
Aggressor 7 cm	AG7F	floating	6,4 g	2 x nr. 8	2 - 4 m
Aggressor 9 cm	AG9F	floating	11,2 g	2 x nr. 6	2,5 - 5 m

Available colours:

Available colours:

Sniper

Amazing sinking and floating

It is probably the smallest Wobbler in the world, measuring only 2.2cm. It may look like a small Minnow or just some insect that has fallen into the water. It is designed to be fished at either fast or slow retrieve, making this lure very adaptable in all fishing conditions for a variety of fish. It is a real killer, especially for Trout and Chub, but you will not be surprised even if you catch non-carnivorous fish. You will appreciate the Sniper in bigger sizes for its original flattened shape and noticeable ribbing.

Recommended for: Trout, chub, perch, white fish

Model / Length	Art. Nr.	Version	Weight	Hooks	Diving depth
Sniper 2,2 cm	SN2,2F	floating	1 g	1 x nr. 12	0 - 0,8 m
Sniper 2,2 cm	SN2,2S	sinking	1,1 g	1 x nr. 12	0 - 1 m
Sniper 3 cm	SN3F	floating	1,5 g	2 x nr. 14	0 - 1,2 m
Sniper 4 cm	SN4F	floating	2 g	2 x nr. 12	0 - 1,5 m

Tip

Such a small specialised Wobbler needs lighter tackle with a line up to 0.14mm, a lighter one is ideal, this will allow the rod to impart a life like action to the lure. Use this in conjunction with an ultra light spinning rod with a fine tip and a light fixed spool reel. Either use a very small snap link or, ideally attach the lure with a loop. NEVER tie the line tightly directly onto the Wobbler loop.

Perch

Amazing floating

A Perch is such a favourite colourful carnivore that it deserves an imitation. It is the best Wobbler in the smallest size of 3.5cm, which dives in a shallow way and has scope for fast movement. It is an ideal specialist Perch with a length of 4.5cm - it dives quickly to the bottom and works well on a slow retrieve. The 9cm long Perch works very aggressively, has a wide movement spread on a slow retrieve.

Recommended for: (size 3 - 4,5 cm) trout, chub, perch
(size 4,5 cm long) perch, zander
(size 9 cm) pike, zander, cat fish

Model / Length	Art. Nr.	Version	Weight	Hooks	Diving depth
Perch 3,5 cm	PE3,5F	floating	1,1 g	1 x nr. 12	0 - 1 m
Perch - long 4,5 cm	PEL4,5F	floating	2,6 g	2 x nr. 12	1 - 3 m
Perch 4,5 cm	PE4,5F	floating	2,3 g	2 x nr. 12	0,8 - 1,5 m
Perch 9 cm	PE9F	floating	11 g	2 x nr. 6	1 - 2,5 m

Rapex

Amazing floating

You have probably never seen anything like it! This Wobbler is our idea and it is based on a marriage of Wobbler with a trolling spoon, how simple and effective! The body makes typical Wobbler movements and the trolling spoon rotates under the body and creates a fascinating combination. The RAPEX does not go too deep because of its rotating wing; this is why it is more of a surface Wobbler.

Recommended for: pike, zander, trout, bass

Model / Length	Art. Nr.	Version	Weight	Hooks	Diving depth
Rapex 7 cm	RA7F	floating	6 g	1 x nr. 8	0,5 – 1 m
Rapex 9 cm	RA9F	floating	10,8 g	1 x nr. 4	0,5 – 1,2 m

Maybug

Amazing floating

The MAYBUG is a floating Wobbler that imitates a real insect that has fallen into the water, this makes it suitable for cruising feeders just under the water surface. It is also suitable for small rivers. These fish love to hunt under overhanging branches or close to overhanging grassy banks, it is not long before the fish takes the lure. A very slow retrieve is necessary, holding the tip of the rod in a high position, so that the current does not take the lure to the bottom. This Wobbler has a fine oscillatory motion and a narrow movement spread.

Recommended for: trout, chub,

Model / Length	Art. Nr.	Version	Weight	Hooks	Diving depth
Maybug 3 cm	MA3F	floating	1,2 g	1 x nr. 12	surface

Tip

The MAYBUG is ideal for very small overgrown rivers. In case you are unable to cast due to the vegetation, let it drift as far as possible to a place where un-startled fish are feeding and spin very slowly. Watch the water for the tell tale "V" as fish home in on the lure, prepare for a smash take as you can see every movement and contact of the fish with the Wobbler.

-C22

-C23

-C24

-C25

-C26

This is the perfect Wobbler for catching Pike or Pikeperch, it is one of the most effective wobblers that we have used, it works very naturally. The small movement spread together with the side movements, make this lure able to outwit the smartest Pike.

Recommended for: pike, zander

Model / Length	Art. Nr.	Version	Weight	Hooks	Diving depth
Pike 7 cm	PK7F	floating	4,2 g	2 x nr 8	0,5 - 2m
Pike 9 cm	PK9F	floating	8 g	2 x nr. 6	1 - 2,5 m

Tip

It is advisable to alter the speed of retrieve to make the Wobbler even more attractive.

Trout

Amazing sinking and floating

The trout is probably the smallest two piece Wobbler on the market. The original shape and movement make this a unique lure, small details like the dorsal and adipose fins make this extremely lifelike. It is great both in still or running water, try holding the lure in the current and work the Wobbler by lifting and dropping the rod top. Its small and fast action creates the interest of any nearby carnivore and is able to provoke it with much delay. The 7cm size is suitable for big rivers and Huchen.

Recommended for: (size 4-5 cm) trout, chub, perch,
(size 7 cm) pike, zander, huchen

Model / Length	Art. Nr.	Version	Weight	Hooks	Diving depth
Trout 4,5 cm	TR4,5F	floating	1,9 g	2 x nr. 12	0 - 0,8 m
Trout 4,5 cm	TR4,5S	sinking	2,2 g	2 x nr. 12	0 - 1 m
Trout 5 cm	TR5F	floating	3 g	2 x nr. 10	0 - 1,2 m
Trout 7 cm	TR7F	floating	7 g	2 x nr. 8	0,3 - 1,5 m

Power perch

Amazing floating

This family of Wobblers are a life-like imitation of a real Perch, available in typical Perch colours. The marked fins and aggressive action make this lure an all-rounder, suitable for every known predator.

Recommended for: (size 2,5 – 4 cm) chub, trout, perch,
(size 6 cm) pike, perch, zander,
(size 8 cm) – pike, zander
(size 13 cm) cat fish, pike, zander

Model / Length	Art. Nr.	Version	Weight	Hooks	Diving depth
Power Perch 2,5 cm	PP2,5F	floating	1 g	1 x nr. 12	0,3 - 0,8 m
Power Perch 4 cm	PP4F	floating	2,5 g	2 x nr. 12	0,5 - 1 m
Power Perch 6 cm	PP6F	floating	4,7 g	2 x nr. 8	1 - 1,5 m
Power Perch 8 cm	PP8F	floating	9 g	2 x nr. 6	1,2 - 2 m
Power Perch 13 cm	PP13F	floating	26 g	2 x nr. 4	1,5 - 2,5 m
Power Perch - long 2,5 cm	PPL2,5F	floating	1,1 g	1 x nr. 12	0,5 - 1 m
Power Perch - long 4 cm	PPL4F	floating	2,6 g	2 x nr. 12	0,5 - 1,5 m
Power Perch - long 6 cm	PPL6F	floating	4,8 g	2 x nr. 8	1 - 2,5 m
Power Perch - long 8 cm	PPL8F	floating	10 g	2 x nr. 6	1,5 - 3,5 m
Power Perch - long 13 cm	PPL13F	floating	27,5 g	2 x nr. 4	2 - 3 m

Crucian

Amazing sinking

This is a Jerk lure, fish this with a very stiff rod and make the rod tip do ALL of the work, vary the style to give uncoordinated movements to resemble a sick and struggling fish. This is a heavy lure and can be cast a long distance.

Recommended for: cat fish, pike, zander

Model / Length	Art. Nr.	Version	Weight	Hooks	Diving depth
Crucian 7 cm	CR7S	sinking	19 g	2 x nr. 6	up to 2 m
Crucian 9 cm	CR9S	sinking	43 g	2 x nr. 4	up to 3 m

Tip

Always use a wire leader to avoid wrapping the lure.

Available colours:

Available colours:

Barbel

Amazing floating

"If you want to catch big fish, use a big Wobbler", It is a very simple principle that is still true. This Wobbler is best used to catch big hungry predators. It is popular mainly for its running, the dominant side movement also provide good credibility for a wounded prey. BARBEL is both suitable for spinning and trolling, the split model is ideal when the predators are laying low in the water and need provocation in order to make them interested.

Recommended for: Pike, Zander, Cat fish, Huchen

Model / Length	Art. Nr.	Version	Weight	Hooks	Diving depth
Barbel 13 cm	BL13F	floating	16 g	2 x nr.4	1 – 3 m
Barbel 14cm	BLJ14F	floating	17 g	2 x nr.4	0,5 – 1,5 m
Barbel 15cm	BL15F	floating	32 g	2 x nr.1	0,8 – 2,5 m
Barbel 16 cm	BLJ16F	floating	34 g	2 x nr.1	0,5 – 1,8 m

Tip

The Pike reacts when lure movement is activated by irregular rod tip movement, monotonous spinning will not interest an indifferent fish.

lovec Rapy

Editorial

About Lovec Rapy

Team work: In the Czech Republic Director David works alongside his cousin Peter.

We insist on hand painting which makes every lure unique.

Inspiration comes from many sources, like this meeting with famous angler and promoter of angling in Poland, Mr. Marian Paruzel.

Making a presentation for traders.

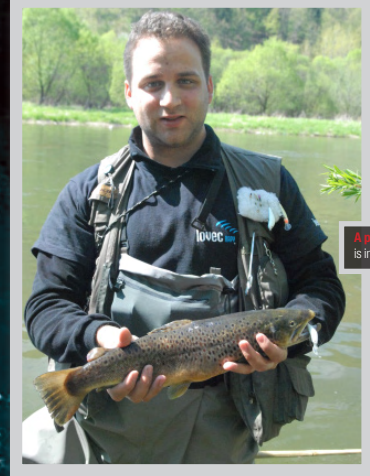

"I only catch with your wobblers, which I absolutely trust. Plenty of major league competitors bought Lovec-Rapy lures after seeing how successful I was with them. Lovec-Rapy lures helped me even in the worst conditions and when all other lures failed."
The captain of the golden Czech national spinning team in 2008.

Co-operation is key. Says David: "In 2005 we had the idea of creating a company together, even though we are 700 km apart in the Czech Republic and Poland". Taking our products to trade shows was an important step."

The personal touch. "We travel to visit our exclusive agents in various countries. We co-operate with exclusive agent in each country."

A perfect combination. Sebastian (right) is in charge of production, David (left) is in charge of sale.

Meeting with anglers is vital.

Attention to detail. "All our products are handmade by skilled anglers," says David.

Great catches! Join in the competition on the web page www.lovec-rapy.com
